

SPECIFICATIONS:

Vertical mounting triangle leaves industry hinge with ball bearing. Dimensions 100/115

- Product Code: 020
- Material: Steel, Primed or Galvanized
- Grease Nipple enables the hinge additional greasing.
- The hardened steel bowl filled with ball bearings carry the weight of the door in every position of the hinge.
- Knuckle is inner then the lower surface of the leaf, that is why the hinge motion does not scratch the mounting surface
- There are different versions with different leaves and different lengths in stock
- Different product codes for different variants are: 021, 022, 023, 024

APPLICATIONS

- Heavy doors and shutters
- Heavy-duty doors and shutters
- Challenging environments: vibration, dust

INSTALLATION INSTRUCTIONS

- The hinge can be installed in any position
- The hinge can be fastened with screws or welded to the door and the door frame
- If the hinge is welded on both sides, the door can not be detached from the hinge and bearing
